## Is Bazaard Secure?

### -Bazaard Provides SSL Certificates

After your custom store is ready, Bazaard will provide your store with an SSL certificate. SSL certificates encrypt your store's content and publish it securely over HTTPS instead of HTTP. SSL certificates provide an extra layer of security for your content and data.

### -Bazaard's Security Response

Merchants can report potential security threats and technical issues via live support or by emailing [support@bazaard.co](mailto:support@bazaard.co). Issues will be resolved promptly.

### -Bazaard is a fully hosted solution.

Merchants on Bazaard never have to worry about updates, server-side issues, or security upgrades. Automatic security allows merchants to focus their time and energy on more important goals to grow their business. These goals include content creation, data-driven marketing, social influence, and customer engagement.

### -Admin Security.

Depending on the plan you choose, Bazaard protects you from security breaches with its staff permissions system. You can set up and lock accounts for anyone who has access to your Shop Admin.

### -Fraud Protection.

We track every store to protect Bazaard Shops from fraudulent chargebacks and act against such users. At the same time, we protect buyers from fake shops or shops selling illegal substances.
